L. SCOTT & CO., NEW YORK, continue to publish the following leading British Periodicals, viz: THE LONDON QUARTERLY (Conservative.) THE EDINBURG REVIEW (Whig.)

THE WESTMINSTER REVIEW (Liberal.) BLACKWOOD'S EDINBURG MAGAZINE (Tory.) ----

The present critical state of Unropean nffairs will render those publications unusually interesting during the forthcoming pear. They will occupy a middle ground between the lastily written news-items, crude speculations, and flying rumors of the daily Journal, and the ponderous Tome of the luture historian written after the living interest and excitement of the great political events of the time shall have passed away. It is to these Periodicals that readers must look 6 r the only really intelligible and reliable history of current events, and has such, in addition to their well-established literary, scientific, and theological character, we urge them upon the consideration of the reading public.

The receipt of Advance Sheets from the British publishers gives additional value to these Reprints, inasmuch as they can now be placed in the bands of subscribers about as soon as the original entitious.

SCIENTIFIC AMERICAN!

IN THE WORLD. SEVENTEENTH YEAR. VOLUME VI.-NEW SERIES.

A NEW volume of this widely circulated paper commences on the tirst of January. It is published WEEKLY, and every number contains sixteen pages of useful information, and from five to ten pages of useful information, and from five to ten pages of useful information, and discoveries, all of which are prepared expressly for its columns.

TO THE MECHANIC AND MANUFACTURER. No person engaged in any of the mechanical or manufacturing pursuits should think of "doing without" the Scientific American. It costs but four cents per week; ever manber contains from six to ten engravings of new machines and inventions, which can not be found in any other publication. It is an established rule of the publishers to insert aone but original engravings, and those of the first class in the art, drawn and engraved by experienced persons under their own supervision.

tion. It is an established rate of the publisher's to insert aone but original engravings, and those of the first classis in the art, drawn and engraved by experienced persons under their own supervision.

TO THE INVENTOR.

The Scientific American is indispensable to every inventor, as it not only contains illustrated descriptions of nearly all the best inventions us the come out, but each number contains an Official List of the Claims of all the Patepts issued from the United States Putent Office during the week previous; thus giving a correct bustory of the progress of inventions in this country. We are also receiving every week, the best scientific journals of Great Britain, France, and fernany, thus placing in our presession all that is transpiring in mechanical science and art in these oliceountries. Weshall continue to transfer to our columns copious extracts from these journals of whatever we may deem of interest to our renders.

CHEMIST, ARCHITECTS, MILLWRIGHTS, AND FARMERS.

The Scientific American will be found a most useful journal to them. Shall we, then, who have in keeping the honorable menories of our fathers who are amenable to the judgment of the civilized nations, shall we invoke to our aid the negroes of the So th, cilling up the foul spirit of in urree ion, and making infoul spirit of in urree ion, and making in- a means of revenge to destroy the South, but discriminate and uncontrolled war upon men, not to re tore the I'nion, and to that aspect

guenes of the war, the emancipation of the slaves.

In a military point of view, there is weakness, enbarrassment, and bird in the proposition, and no strength. Will out emancipation and its evils, the slaves, found in the neighborhood of the camps, may be used to relieve the soldiers of exhausting labor. Owing service to their in sters, they may be required to render that service to the Government; but if made free, it will be at their discretion and plantage was their they relieve discretion and plantage was their they relieve and plantage was the relieve the soldiers of exhausting labor.

beyond that, how is the negro to be made and element of strength for the suppression of the rebellion? Cameron and his supporters of the Republican party say, put arms in their hands. For what purpose? Are there not as many men in the North reedy to fight as we can arm and feel and clothe and pay? Or is it true, that outnumber of the North falters and fails the research of the suppression of the made and is it true, that outnumber of the South, more call true, that outnumbers to let the North falters and fails has to met, that we may not have the gold and hand to met the South.

win no battle, where the men of the North are driven back. What Gor rel would go into lattle trusting to black regiments for his strength? and what regiment made up of the proud men of Indiana, wo i'd stand in a battle, where they must lead for support upon armed negroes?

Another class, too cowardly to fight, and too malevolent to be gratified by the results of civilized warfure, demand a carnival of blood, and feast of lorrors, and scenes of cervile insurrection. Our fathers dut so the foe that would incite the forest savage to

discriminate and uncontrolled war upon men, women, and children, whill scenes too horrible to be discribed, and too wicked to bring a blessing. As I believe our soldiers are strong and brave, I denounce it us an insult to them; and us I am jenlous of our good name and fair fame, I would make preclamation of it as a thing so atrocious us to consign us to infancy in the eyes of the civilized world.

There is yet another class who demand, some say a purpose, and others as a consequence of the war, the emancipation of the slaves.

The tore the I'nion, and to that aspect of the question I call your attention.

As a party, the Demogracy of the Northwest, have not been sectional, but have advocated equality of rights and privileges to all, and thus far have even conceded that New England and Pennsylvania might have the revenue policy of the United States so adjusted as to give them an always of the united States so adjusted as to give them an always of the states of the remaining the properties.

ment; but it made free, it will be at this for those leavy and bulky urficles that rediscretion and place are used upon the breas works; at least such is the view of the right hose regions from which there is con-Administration, as expounded by the Seretary of War, who says. The Government has no power to had slaves, none to restrain a slave of his liberty, or to exact his service. It has the right, however, to use the voluntary services of slaves, liberated by war from the factors and this near the cost of transportary services of slaves, liberated by war from tary services of slaves, liberated by war from their rebel masters."

If the slave be treed by the act of the Gov-nalign policy of the party now in power is ernment, and the masters there by discharged the enachor it of the tarifful but simmer, from the eare and responsibility of their main - which in or livery times will be prohibitory tenance, that by iden at or considering the and because and sell at low prices, and Administration. The argument of the Secretary of Way and the President amount to just this: By the authority and mat of the Government, the slaves are made free, horause of the reladthe slaves are made free, because of the relading of the masters, and being free, the Goviernment can not exact their services; involutile of corn is being burned as the cheapernment can not exact their services; involuntely service would neak them slaves, and the Government can not hold slaves; but being free by her act, they are dependent upon the United States, with must be provided for a long of the Alumistration.
